PROFESSIONAL SUMMARY

Data Science Master's student passionate about building scalable, data-driven solutions and extracting actionable insights from complex datasets. Adept at leveraging machine learning and natural language processing to develop end-to-end analytical models. Experienced in delivering practical, impactful projects utilizing Python, SQL, and modern web technologies.

EDUCATION

- **Masters in Data Science** 2025-27
Indian Institutes of Information Technology, Lucknow
- **Bachelor of Science in Computer Application and Cyber Security** 2022-25
Jharkhand Raksha Shakti University, Ranchi CGPA: 7.92

PROJECTS

- **Aspect Pulse: Sentiment Analysis on Samsung S25** Jan 2026 – Present
An aspect-based sentiment analysis tool extracting user opinions on specific smartphone features.
 - Scraped and preprocessed user reviews to isolate and analyze sentiments targeted at specific device aspects such as the camera, battery life, and display.
 - Utilized Natural Language Processing (NLP) techniques to accurately categorize feedback into positive, negative, and neutral buckets for clear consumer insights.
- **Crop Yield Prediction System** Nov 2025 – Dec 2025
Machine learning model to predict optimal crop choices based on environmental factors.
 - Developed a predictive model using Python, Pandas, and Scikit-Learn to analyze agricultural data including soil metrics, temperature, and rainfall.
 - Implemented classification algorithms to recommend the most suitable crops, enhancing data-driven agricultural decision-making.
- **Movie Recommendation System** Apr 2025 – May 2025
A recommendation engine designed to suggest movies based on metadata and user preferences.
 - Built a content-based filtering system using Python, leveraging dataset features like genres, cast, and crew to find similar titles.
 - Processed large datasets using Pandas and NumPy, applying cosine similarity to accurately calculate and rank movie recommendations.

ACADEMIC EXPERIENCE

- **Teaching Assistant** Aug 2025 - Dec 2025
Indian Institutes of Information Technology, Lucknow Lucknow, UP
 - Assisted professors in managing coursework, designing assignments, and delivering supplementary instruction for undergraduate computer science and data science courses.
 - Conducted weekly doubt-clearing and practical lab sessions, guiding students through complex programming concepts and debugging.
 - Evaluated and graded student projects, assignments, and examinations, ensuring fair and constructive feedback to support academic growth.

TECHNICAL SKILLS AND INTERESTS

Languages: C/C++, Python, JavaScript, HTML+CSS
Libraries: Pandas, Numpy, PyTorch, Matplotlib, Scikit-Learn, NLTK
Big Data: Hadoop, Yarn
Operating System: Linux/Ubuntu
Cloud/Databases: MongoDB, Relational Database (MySQL)
Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management System, Big Data Analysis.
Areas of Interest: Data Science, Machine Learning, Web Design and Development, Cloud Security.
Soft Skills: Problem Solving, Self-learning, Presentation, Adaptability

POSITIONS OF RESPONSIBILITY

- **Tech Support Volunteer** College Event - JRSU, Ranchi Aug 2024
 - Provided real-time technical assistance for an event, maintained continuous system availability for all presentations.
 - Troubleshoot connectivity issues.
